Research statement, publications, and output.

My research focuses on understanding the wealth of **social relationships** people have (e.g., romantic relationships, friendships, family relationships) and understanding the role of **individual differences** (e.g., personality, height, hormones,...) for these social relationships from an **inter-disciplinary framework**. To this end, I conduct survey, observational, and experimental studies, next to analysing secondary datasets. Furthermore, I am interested in (improving) **methodology and statistics** and frequently collaborate with others on diverse topics.

Here are what I personally consider to be my five best publications:

Pollet, T.V. & Saxton, T.K. (in press). Jealousy as a Function of Rival Characteristics: Little support for sex-specific mechanisms across two large replication studies. *Personality and Social Psychology Bulletin*

Pollet, T.V., Tybur, J.M., Frankenhuys, W.E.F. & Rickard I.J. (2014), What can cross-cultural correlations teach us about human nature?. *Human Nature*, 25, 419-429.

[IPUMS](#) paper finalist in 2009. (Top 10 paper in 2009 based on IPUMS data)

Nominated as Honorary Belgian American Exchange Foundation ([BAEF](#)) Fellow (2008).

Teaching.

I have been teaching for over a decade in various roles, my courses are generally positively evaluated. I have three certificates demonstrating my teaching qualities: 1) Postgraduate certificate for Teaching (Newcastle University), 2) BKO: Qualification for Teaching by Dutch Universities (VU University Amsterdam) and 3) HEA Fellowship (Northumbria University). Most of my teaching revolves around evolutionary and social psychology, next to methodology, and is taught in English. I actively promote open science when teaching, examples can be found [here](#).

I am a Director of Learning and Teaching (Experience) at my psychology dept. This involves coordination of induction, coordination of open days, leading staff-student programme committees, liaising with programme leaders on student experience, coordinating our departmental NSS strategy. I also represent our department at relevant faculty and university-wide meetings.

The most gratifying aspect of my teaching is that several of the students, which I supervise produce work which has been subsequently published in peer reviewed journals (e.g., papers 43,46,47,53,61,64,67,75,78,89,90,96,101,103 from [here](#)).
