Research statement and publications

My research focuses on understanding the wealth of **social relationships** people have (e.g., romantic relationships, friendships, family relationships) and understanding the role of **individual differences** (e.g., personality, height, hormones,...) for these social relationships from an **inter-disciplinary framework**. To this end, I conduct survey, observational, and experimental studies, next to analysing secondary datasets. Furthermore, I am interested in (improving) **methodology and statistics** and frequently collaborate with others on diverse topics.

Here are what I personally consider to be my five best publications:

Stulp, G., Buunk, A.P., Verhulst, S. & Pollet, T.V. (2015), Height Is Positively Related to Interpersonal Dominance in Dyadic Interactions. *PLoS ONE*, 10, e0117860.

(Co-)Supervision of Ph.D. students

I am involved in the external supervision of other students, here I list the students at the universities I worked at. I am currently also an external advisor on two Ph.D. projects, at TU Delft and University of Antwerp, respectively. I have been part of external Ph.D. committees for the University of Essex, University of Helsinki, and the University of Groningen.

Current: Alexandra Beecham.

Teaching.

I have been teaching for over a decade in various roles, my courses are generally positively evaluated. I have three certificates demonstrating my teaching qualities: 1) Postgraduate certificate for Teaching (Newcastle University), 2) BKO: Qualification for Teaching by Dutch Universities (VU University Amsterdam) and 3) HEA Fellowship (Northumbria University). Most of my teaching revolves around evolutionary and social psychology, next to methodology, and is taught in English.

The most gratifying aspect of my teaching is that several of the students, which I supervise produce work which has been subsequently published in peer reviewed journals (e.g., papers 43,46,47,53,61,64,67).
